

David Murgulet

4th Year Computer Science Major

Portfolio | 604-353-4130 | davidgmurgulet02@gmail.com | [LinkedIn](#) | [GitHub](#)

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL, JavaScript, TypeScript, CSS, HTML, PHP

Tools/Frameworks: Git, React, Node.js, Vue.js, MongoDB, Docker, Kubernetes, AWS, S3, Lambda, EMR

Testing: JUnit, GDB, Mocha

PROJECTS

InsightUBC | *TypeScript, JavaScript, HTML, Bootstrap, Mocha*

September 2023

- Developed a full stack website using **TypeScript**, **JavaScript** and **HTML** to query files containing course and room information within UBC
- Implemented a **RESTful** server to query parsed information based on user inputs and display desired data to user
- Executed **Test Driven Design** for both black box and glass box testing using **Mocha** and **Chai** to develop a strong test suite
- Incorporated **Agile** process with a partner for a cohesive and effective approach to project delivery
- Refactored query engine to allow for more efficient parsing and 10% faster execution of queries

Study Spots | *JavaScript, React, MongoDB, NoSQL, Bootstrap*

January 2023

- Developed a full stack website using **React** to allow students to browse and create reviews for study spots within UBC
- Constructed a **NoSQL** database using **MongoDB Atlas** to store and maintain information for study spots and their reviews
- Implemented a backend on **Node.js** which utilized a server to process and recover requested information to web users onto the frontend
- Designed a fully functional frontend using **React Bootstrap**

SloReverber | *React, JavaScript, Node.js, Tailwind*

August 2024

- Built a web application allowing users to upload audio files or submit YouTube URLs for metadata editing and audio effect customization
- Utilized **Node.js** to handle server-side logic for processing audio files and applying changes to metadata and audio effects
- Created a seamless, responsive user interface using **Vite** and **Tailwind**, ensuring compatibility across devices

Blackjack Bot | *Python, YoloV8, EasyOCR, OpenCV, PyAutoGUI*

October 2024

- Developing an automated Blackjack playing bot that captures and processes game frames in real-time using **OpenCV** and **YoloV8**.
- Utilizes **YOLOv8** for game element object detection and **EasyOCR** for text recognition to extract game values
- Designed a robust game state management system to make decisions based on detected game states and player actions.
- Employed **Agile** methodologies to iteratively develop and refine the bot, ensuring efficient development

EXPERIENCE

Contractor

May 2024 – June 2024

Sofo Kitchens

- Successfully restored and managed the company's job status database, recovering lost job records and implementing measures to prevent future losses
- Conducted drop-offs for completed jobs, ensuring timely and damage-free deliveries to clients
- Operated in the spray booth to stain and finish various cabinet and furniture pieces

Airline Catering Staff

September 2023 - December 2023

H&C Sandwiches

- Prepared and assembled high-quality sandwiches and meals in compliance with airline and food safety standards.
- Maintained a clean and organized work environment, adhering to all sanitation and health regulations.

EDUCATION

University of British Columbia

Expected in November 2025

Bachelor of Computer Science
